

Medit Orthodontic Suite

Digital Orthodontics Done Right

New Workflow for Aligners: Chairside Diagnosis and Planning

Simulate, plan, and design chairside with Medit Orthodontic Suite, an innovative workflow to accelerate ortho practices from scanning to final design within minutes using AI, algorithms, and embedded orthodontic protocols.

Create simulations and present immediate outcomes with multiple treatment scenarios to give patients clarity—so patients can decide faster with confidence.

Now Available in the United States.

Key Benefits

-  **Intuitive & Immediate Treatment Planning:** Minimize waiting time with realistic simulations and treatment plans generated within minutes.
-  **Clinician-Led, Chairside Decision-Making:** Provide personalized treatment with various options, all accessible with the patient still in the chair.
-  **No Outsourcing Delays:** Streamline workflows by eliminating the need for third-party communication or lengthy design approval processes.
-  **Higher Conversion Rates:** Reduce patient drop-offs and increase satisfaction with faster, clearer, and more predictable treatment initiation.
-  **Same-Day Aligner:** Begin treatment before the patient leaves the office by printing the first few stages immediately after diagnosis *(depending on the environment and setup of each clinic)*.
